

THE SCENERY SHOULD LEAVE
YOU BREATHLESS.
NOT YOUR REGULATOR.

Take a deep breath. Now exhale. You've just tested our new titanium regulator. We've achieved something that no other high performance regulator has. A breathing quality so natural, a breath at the surface feels just like one at two hundred feet. And...we made it out of titanium, which is half the weight of steel and will never rust or corrode. Because scenes like this should be your only breathtaking experience. Call for a free brochure, 714-375-1433, or visit our web site at www.atomicaquatics.com.
